

Ardent Life Sciences Solutions

The Ardent Way

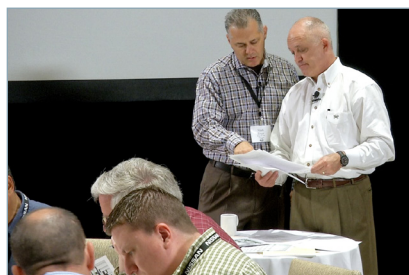

Ardent combines learning theory with real world practical experience to provide performance improvement programs to the Pharmaceutical industry. Our team of Instructional Designers, SME's and technology experts helps solve a wide variety of business challenges and has delivered quantifiable results including:

- ➔ Customer satisfaction improvements
- ➔ Sales increases
- ➔ New pharmaceutical product launches
- ➔ The entire range of HR from onboarding to leadership

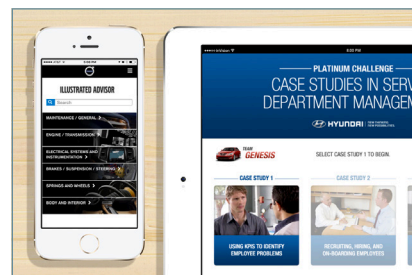

Delivery Methods

How learning is delivered directly impacts performance, results and retention. Ardent utilizes a blended learning approach and suggests the most effective strategy based on customer requirements. We develop and deliver everything from classroom-based instructor led training to 100% online E-learning. Ardent is on the leading edge of integrating learning design with technology.

Instructor Led Training

Our ILTs are designed to make activities interesting, promote knowledge and transfer skills.

Apps

Mobile, tablet, iOS, Android™, web-based or native, our apps are designed to inform and improve independent of platform.

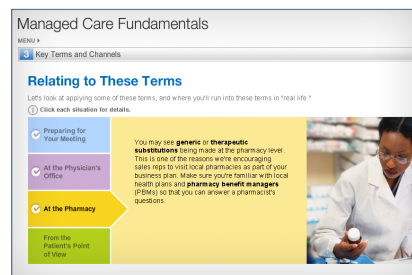

Videos

From live-action behavior-modeling scenarios to motion graphics animation, our video capabilities are expansive.

Websites & Portals

From information resource portals to community-driven blogs, we build sites that keep people informed and connected.

E-Learning

Our cost effective E-learning courses provide the highest return on investment for your training dollars.
